SAMER SHAWAR

PRODUCT DESIGNER

Jerusalem | samer.shawar@gmail.com | samershawar.com | +972 58 675 5227

PROFILE

Product designer with ten years across SaaS product design and HCI research. What I enjoy most is sitting with users, watching where they get stuck, and turning that into interfaces that feel obvious. I like building design systems, running usability tests, prototyping in Figma, and the unglamorous accessibility and cleanup work that keeps a product consistent as it grows. Curious about AR and new ways people interact with technology.

PROFESSIONAL EXPERIENCE

Product Designer, Clove Digital **Mar 2022 – Oct 2024**

Jerusalem

- Built and scaled the product's design system, cutting new-feature design time by roughly a third across 4 product areas.
- Owned end-to-end design for enterprise Amazon seller tooling, from discovery and wireframes through final build with engineering and product.
- Audited existing screens for accessibility and folded accessibility checks into the design review process.
- Ran A/B tests and usability sessions that lifted engagement.

UX Research Assistant, University of Siegen **Jul 2019 – Jul 2020**

Siegen, Germany

- Led user testing and end-to-end journey mapping that informed product improvements across mobile and desktop.
- Refined complex, data-heavy interactions for research products through repeated usability sessions with researchers and engineers.

EDUCATION

MSc, Human-Computer Interaction – Universität Siegen **2017 – 2020**

BA, New Media – Musrara Art School **2012 – 2015**

TECHNICAL SKILLS

Figma · Design Systems · Prototyping · Wireframes · User Flows · Usability Testing · UX Research · Quantitative & Qualitative Research · Accessibility (WCAG)

LANGUAGES

Arabic (native) · English (fluent) · Hebrew (fluent)

SELECTED WORK

Reverse-engineered human hand kinematics at Waseda University to improve a robotic hand built to play saxophone. Tokyo, 2018.

NOTE

UX Mentor at Jerusalem High Tech Foundry (2022 – 2023): mentored 10 emerging designers through workshops on user-centered design, usability testing, and Figma prototyping.
